Division of Oil, Gas and Mining - February 6, 1999

Revised Mine Plan for Nephi Gypsum
Quarry M/023/011 Juab County, Utah

Gentlemen,

Enclosed is an updated map as of February 1, 1999 and a picture of the mine site and stockpile area. Reclaimed lands consist of the downside of the roads to the mine, the stockpile areas and the top of the mined area.

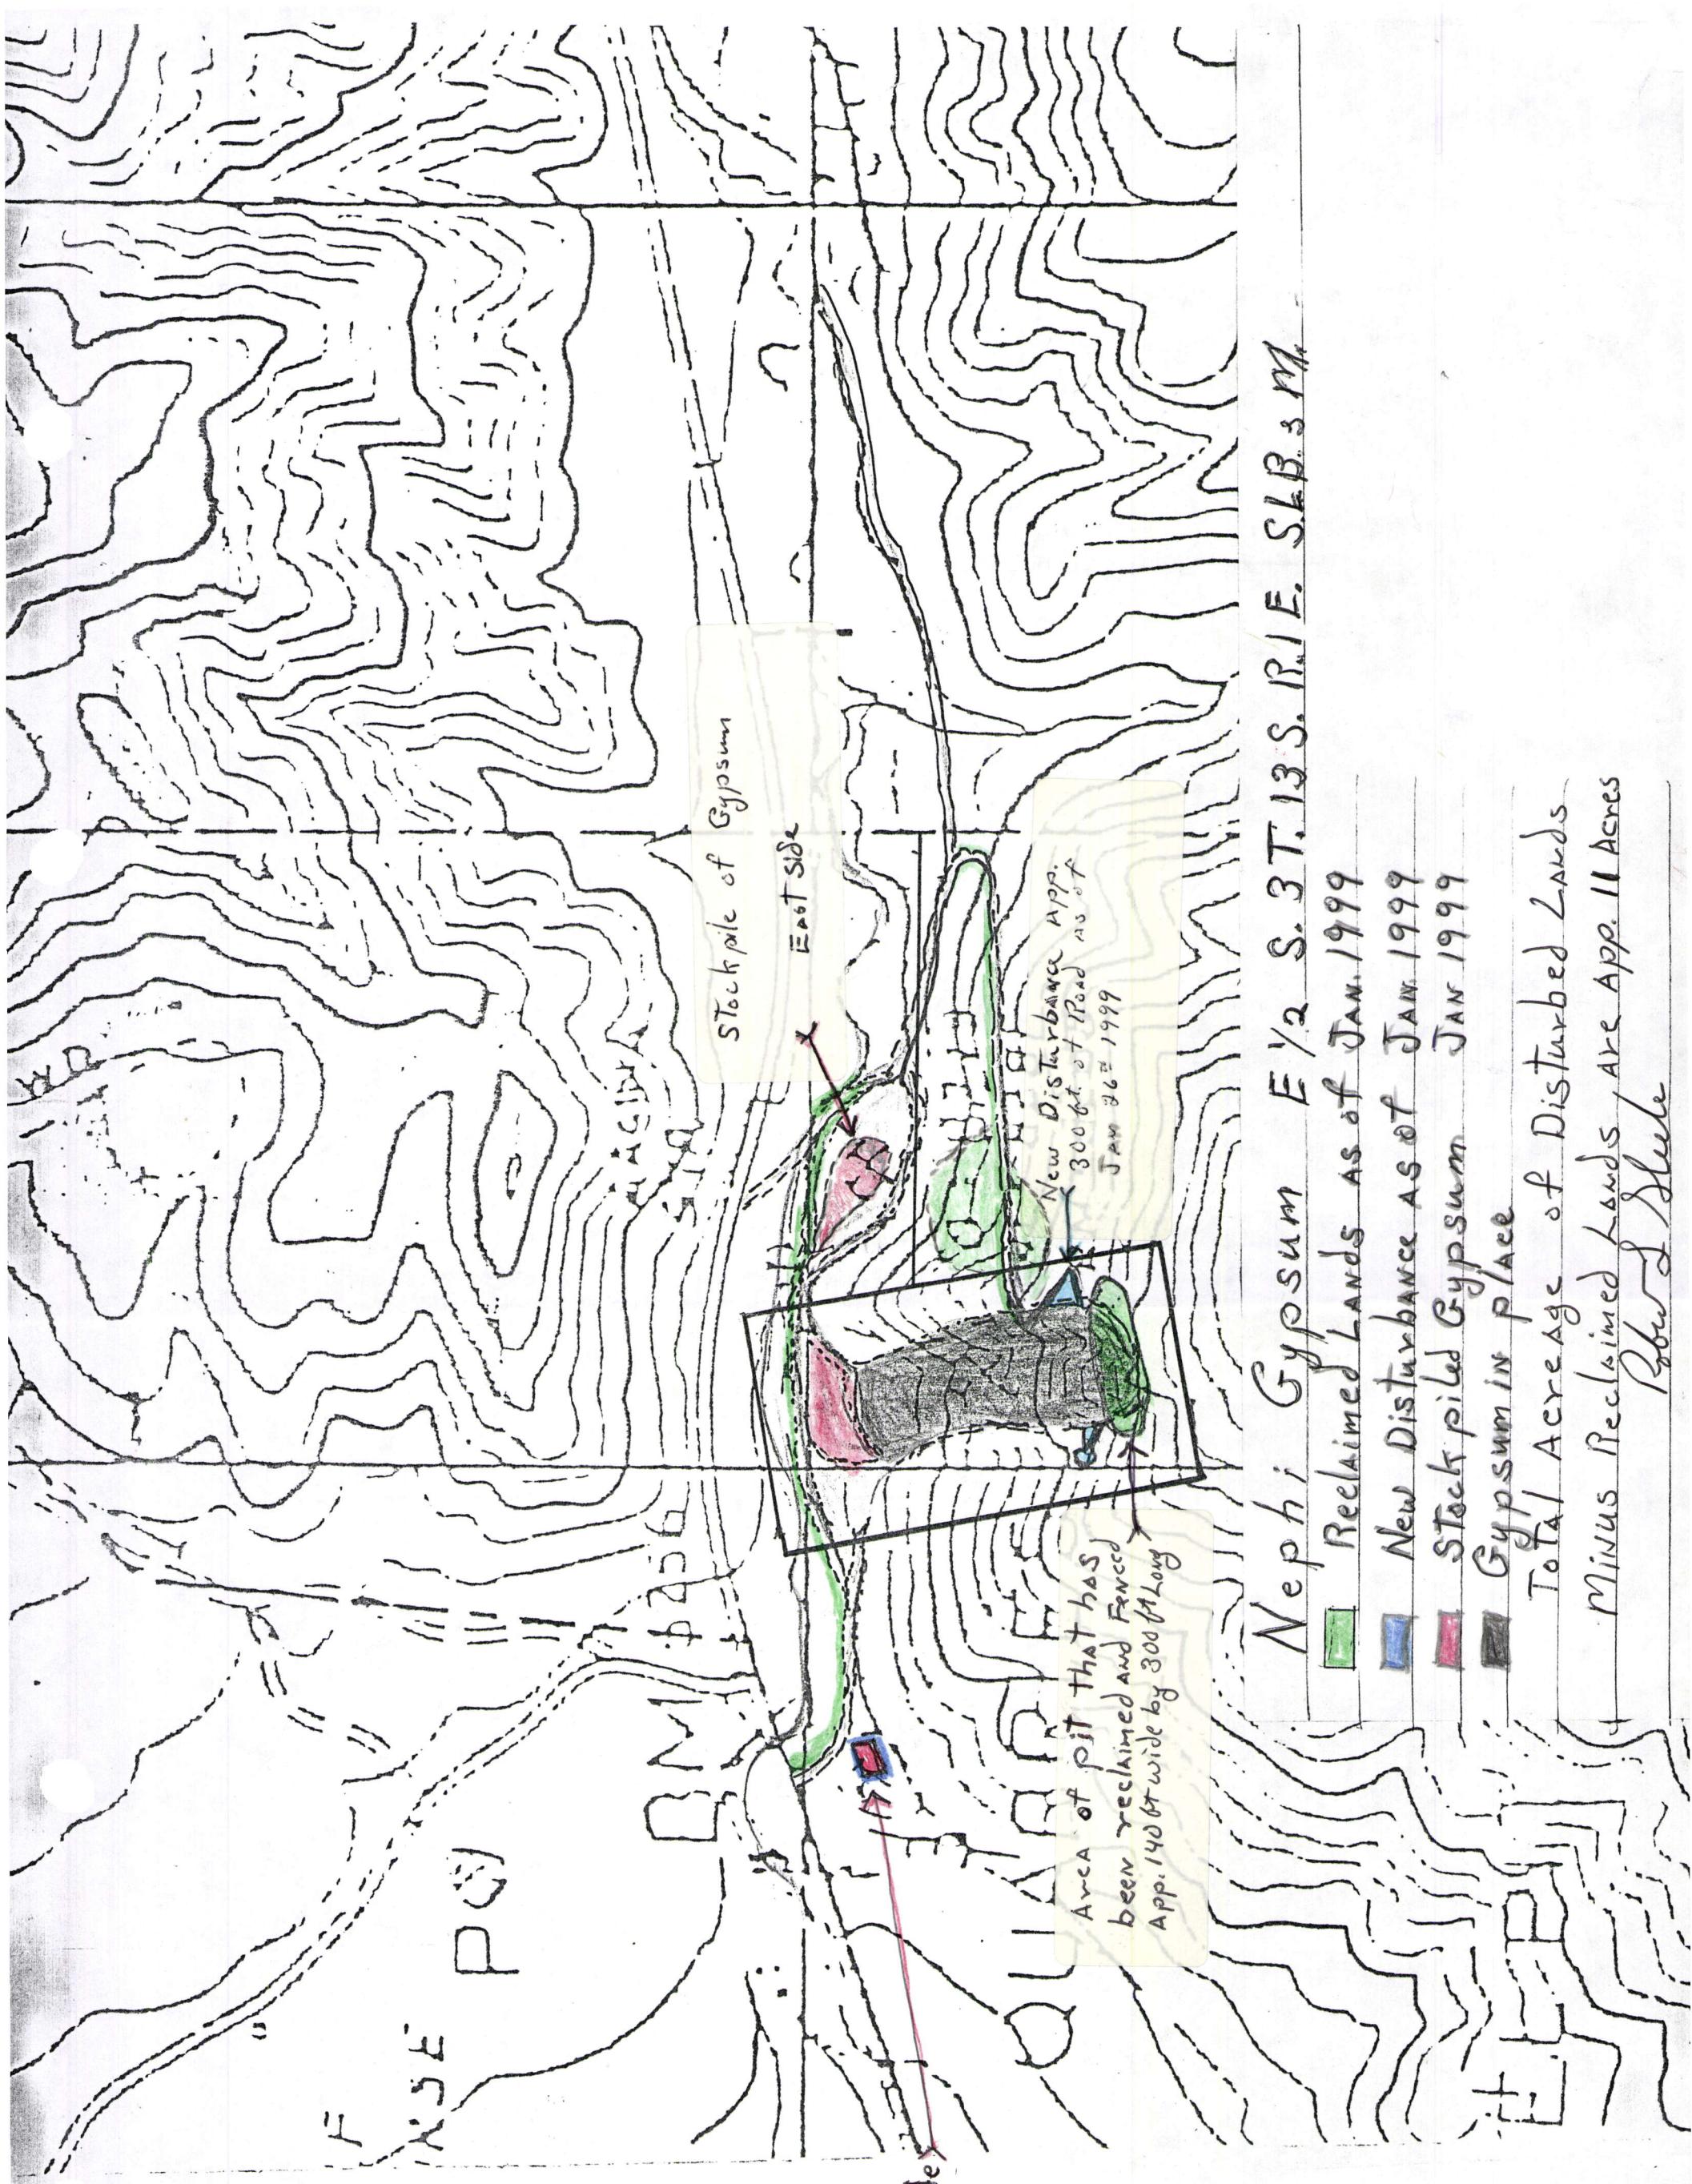

New disturbance is approximately 300 ft. of road and consists of two areas approximately 250'.. below the top of the mine site and the gypsum stockpiled under the open sided shed which is 100'. long and 45'. wide.

As of today approximately 2.5 acres of disturbed lands have been reclaimed and about 1 acre has new disturbance. The lands left to be reclaimed as of February 1999 is approximately 11 acres.

Respectfully

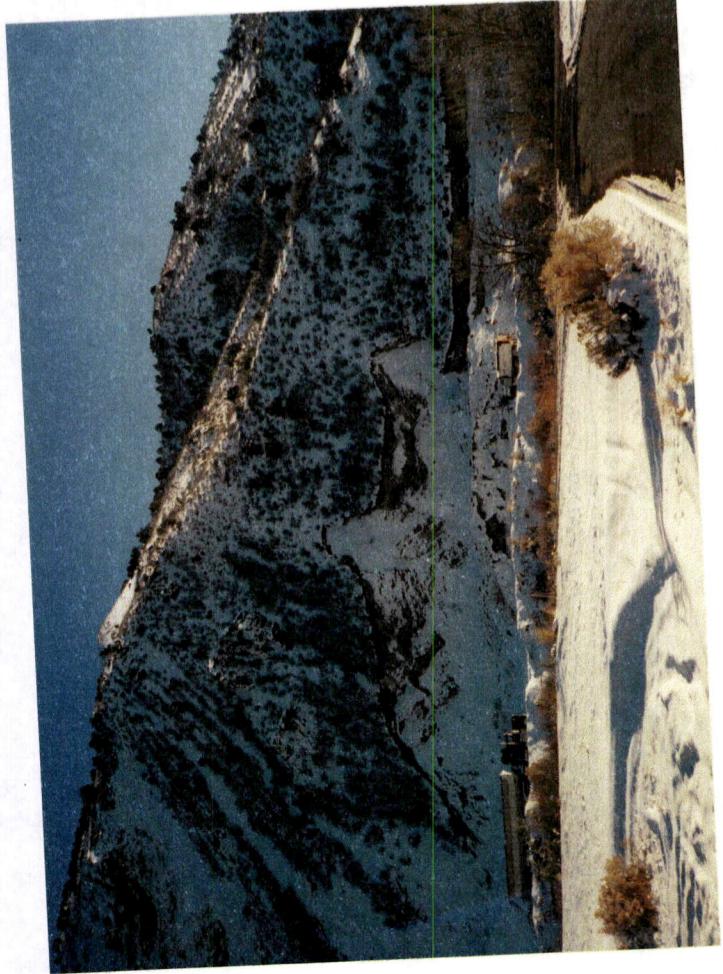

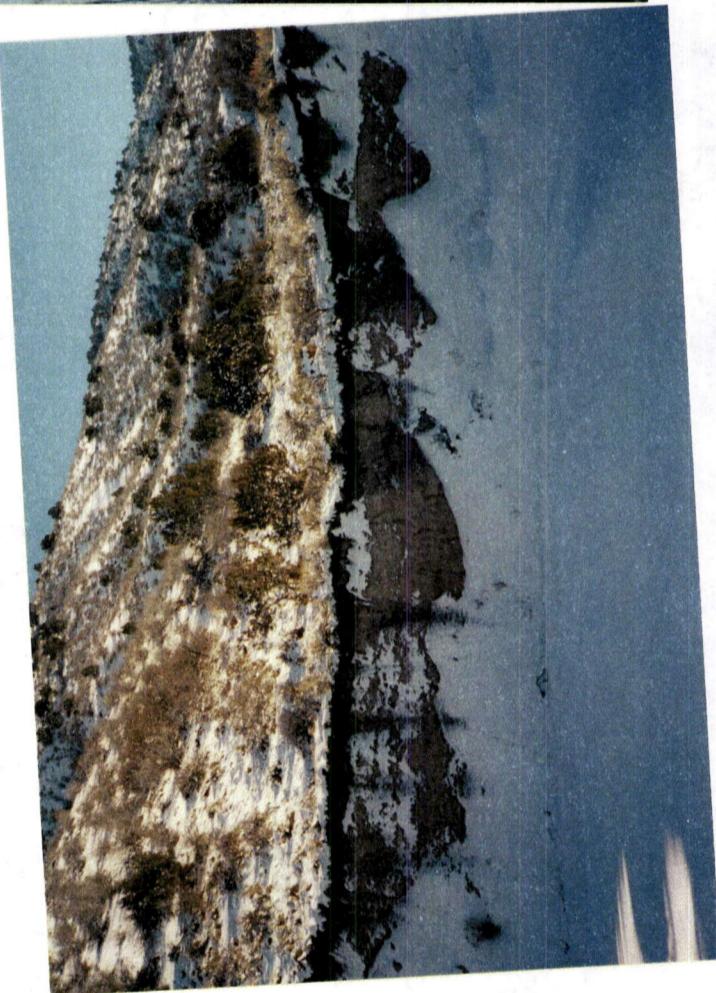

A handwritten signature in black ink, appearing to read "Robert L. Steele".
